Lyphe Australia

Where's my Script?

- Lyphe Clinic will liaise with any pharmacy across Australia. We constantly check prices, discounts and specials with a range of pharmacies we work with closely.
- Lyphe Clinic is a medical centre, we provide appointments with specialised doctors. Any scripts written by our doctors are sent to a pharmacy or directly to you via hard copy or as an E-script. Lyphe Clinic does not have direct control over what happens once the script is with a pharmacy or sent to you directly.
- To make the process as smooth as possible, after your appointment we will send your script to the pharmacy with the lowest price we are able to find for your prescribed product. They will call you to arrange payment and home delivery once the script arrives. We will email you a tracking number to follow the script delivery if via post.
- If you would prefer to choose your own pharmacy or have the script sent to you directly you must inform our staff before, during or immediately after your consult.

Lyphe Australia

Partner Pharmacies

Avg. handling times: Partner Pharmacy: 2-5 days | Self Selected: 7-14 days

- If you are happy for us to allocate your script you can be confident that we will send it to a pharmacy that is knowledgeable about medical cannabis, the government approval process, as well as be able to answer your questions.
- If you wish to select your own pharmacy, it is your responsibility to make sure they are able to dispense medical cannabis products. We cannot guarantee that they will have adequate stock, be able to answer your questions or dispense your script without issues or delays.
- We can recommend pharmacies in most states however we may send your script to a pharmacy in another state if they have better prices or smoother processes. We may allocate your new script to a different pharmacy than your previous script if we can find you a better deal.
- If you have any questions regarding this process or would like advice about choosing a pharmacy, please contact the clinic.
